THE subjoined Table exhibits the number of Graduates at each Commencement since the establishment of the Institution, and the number of Matriculates during each year since the organization of the Faculty by the appointment of the late Dr. CALDWELL as President, 11th July, 1804.

The first printed Catalogue of Students appeared in 1819. Since that time the number of Matriculates has in every instance been greater than that stated in the Table.

**SYSTEM OF STUDIES**  
**PREPARATORY TO ADMISSION**  
**INTO THE**  
**UNIVERSITY.**

---

APPLICANTS for admission into the Freshman Class, are required to sustain an approved examination on the Grammars of the English, Latin and Greek Languages, including Latin Prosody; Mair's Introduction, or Andrews' Exercises; Cæsar's Commentaries (five books); Ovid's Metamorphoses (Gould's Edition—extracts from the first six books); Virgil's Bucolics and six books of the Æneid; Sallust; Greek Testament (St. John's Gospel and Acts of the Apostles); Græca Minora or Greek Reader; Arithmetic; Ancient and Modern Geography.

# COURSE OF INSTRUCTION.

## FRESHMAN CLASS.

### FIRST TERM.

1. Livy—Six Books.
2. Anabasis of Xenophon.
2. Algebra.
4. \*Geography.

### SECOND TERM.

5. Cicero's Orations.
6. Virgil's Georgics.
7. Herodotus.
8. Algebra and Geometry.
9. Geography and History.

## SOPHOMORE CLASS.

### FIRST TERM.

10. Thucydides.
11. Homer's Iliad.
12. Horace—Odes and Satires.
13. Exercises in writing Latin.
14. Geometry completed.
15. Analytical Trigonometry.
16. Navigation.
17. Analytical Geometry.

### SECOND TERM.

18. Horace completed (except the Art of Poetry).
19. Juvenal—6 Satires.
20. Tacitus—Germania.
21. Homer's Iliad.
22. Demosthenes on the Crown.
23. French—Bolmar's Fables.
24. Surveying, Heights and Distances.
25. Analytical Trigonometry completed.
26. Analytical Geometry completed.
27. Mechanics.

## JUNIOR CLASS.

### FIRST TERM.

28. Tacitus—Agricola.
29. Natural Philosophy.
30. Differential & Integral Calculus.
31. Rhetoric.
32. French—Charles XII.

### SECOND TERM.

33. Greek Tragedy.
34. Calculus completed.
35. Astronomy.
36. Rhetoric completed.
37. Logic.
38. Elements of History and Chronology.
39. French—Moliere.
40. Cicero—"Cato" and "Laelius."
41. Horace—Art of Poetry.

## SENIOR CLASS.

### FIRST TERM.

42. Chemistry and Mineralogy.
43. Political Economy.
44. Moral Philosophy.
45. Greek Tragedy.
46. French—Moliere.
47. Mental Philosophy.

### SECOND TERM.

48. National and Constitutional Law.
49. Chemistry and Geology.
50. Horace (Art of Poetry.)
51. Cicero. De Officiis.
52. French—Racine.

\* Geography *should* form no part of the College course—being a study suited to the capacity of a child of from 7 to 10 years of age. But the lamentable ignorance of some who know more or less of Latin and Greek, renders it necessary to give it a hasty review. It is hoped that when Morse's excellent school Geography with Cerographic Maps shall come into general use, this will be unnecessary—so far at least as Modern Geography is concerned.

# LANGUAGES.

---

## DEPARTMENT OF LATIN.

J. DeB. HOOPER, PROFESSOR.

ASHBEL G. BROWN, TUTOR.

### IN THIS DEPARTMENT

THE FRESHMAN CLASS has in the 1st term 76 recitations.

	2d	"	90	"
SOPHOMORE	1st	"	76	"
	2d	"	54	"
JUNIOR	1st	"	57	"
	2d	"	18	"
SENIOR	2d	"	30	"

IN THE FRESHMAN CLASS, the first term is employed in reading six books of Livy; the second, is devoted to Virgil's Georgics and Cicero's Orations, (Anthon's selection.)

THE SOPHOMORE CLASS read in the first term the Odes and Satires of Horace, and in the second, the Epistles of Horace (except the Art of Poetry,) six Satires of Juvenal and the Germania of Tacitus.

THE JUNIOR CLASS is employed during the first term upon the Agricola of Tacitus, the Cato and Laelius of Cicero, and Horace's Art of Poetry; two of Cicero's Philippics occupy the second term.

The recitations of the Senior Class are devoted to Cicero de Officiis.

The instruction of the Freshman Class is committed to the Tutor of Languages; the other Classes are instructed by the Professor of Latin.

## DEPARTMENT OF GREEK.

M. FETTER, PROFESSOR.

A. G. BROWN, TUTOR.

### IN THIS DEPARTMENT

THE FRESHMAN CLASS has, in the 1st term, 95 recitations.			
	2d	"	72
SOPHOMORE	1st	"	76
	2d	"	72
JUNIOR	2d	"	54
SENIOR	1st	"	38

In the first term, the FRESHMAN CLASS read the *Anabasis* of Xenophon, and in the second, one Book of Herodotus.

THE SOPHOMORE CLASS, during the first term, are occupied with one Book of Thucydides and the first Book of Homer's *Iliad*; the second, after the completion of 3 Books of Homer, is devoted to the Oration of Demosthenes on the Crown.

THE JUNIOR CLASS have no recitations in Greek during the first term; they employ the second upon two Tragedies of Sophocles, as selected by the Professor.

An additional tragedy of Sophocles engages the attention of the Senior Class.

The Tutor in this department is charged with the instruction of the Freshman Class; but whenever the Class is so large as to render a division of it necessary, (which is the case during the present term,) the Professor takes a part of the recitations.

The Text-books in use in this department, are the small German Editions, published at Leipsic.

THE instructors in the Latin and Greek Departments, have to complain, that candidates for admission are generally found deficient in some part of the preparatory studies.

Proper attention is seldom paid to Latin construction. However carefully a pupil may read the authors in a language, an accurate knowledge of its syntax will scarcely ever be acquired, without regular and continued training by special exercises. In the Greek Grammar, in Roman and Grecian Antiquities, Ancient Geography and Mythology, the preparation is lamentably defective. Young men come to us without a sufficient knowledge of these subjects to qualify them for understanding the very authors they have been studying at school. Under these circumstances, the College instructor, instead of employing his classes in exercises calculated to mature their scholarship and taste, is obliged to continue the drilling of the Grammar school without its advantages for ensuring success.

The amount of reading required in Greek is sufficiently small, and yet a considerable portion of this is omitted by most of those who apply for admission. A careful study of the whole of the Greek Reader or the Græca Minora is important to the attainment of a high rank in scholarship, and hereafter less than this cannot be accepted.

To the faithful Teachers who are labouring to promote classical learning by thorough elementary instruction, we are already much indebted. We trust that our obligations to them will be still further increased, for on their efforts we must, in a great measure, depend for success in elevating the standard of scholarship in the University.

## DEPARTMENT OF FRENCH.

J. DEB. HOOPER, PROFESSOR.

### IN THIS DEPARTMENT

THE SOPHOMORE CLASS has, in the 2d term, 18 recitations.

JUNIOR	1st	"	57	"
	2d	"	36	"
SENIOR	1st	"	19	"
	2d	"	15	"

The attention of the SOPHOMORE CLASS is occupied principally with the pronunciation of the language and the study of the Grammar, while they acquire some knowledge of words from the use of Bolmar's Fables. The first term of the Junior year is employed upon Voltaire's Charles XII. The remainder of the course is devoted to Moliere's Comedies and Racine's Tragedies.

# MATHEMATICAL DEPARTMENT.

REV. JAMES PHILLIPS, PROFESSOR.

CHARLES PHILLIPS, TUTOR.

## FRESHMAN CLASS.

- First Term.** { Peirce's Algebra, through Equations of the First degree.
- Second Term.** { Algebra through Geometrical Progression, Pierce's Geometry—First ten Chapters.

## SOPHOMORE CLASS.

- First Term.** { Algebra—Logarithms.  
Geometry completed.  
Peirce's Plane Trigonometry.  
Peirce's Analytical Geometry—First six Chapters.
- Second Term.** { Navigation, Surveying, Heights and Distances.  
Peirce's Spherical Trigonometry.  
Analytical Geometry, completed.  
Olmsted's Natural Philosophy; First eight Chapters and the Article on Magnetism.

## JUNIOR CLASS.

- First Term.** { Natural Philosophy, completed.  
Peirce's Differential Calculus; First eight Chapters.
- Second Term.** { Differential and Integral Calculus.  
Peirce's, or Norton's Astronomy.

The Tutor of Mathematics has charge of the Instruction in Algebra, Geometry, the various applications of Plane Trigonometry, and in Spherical Trigonometry. The rest of the course is under the supervision of the Professor of Mathematics. The Students are expected to prepare thoroughly the lessons appointed in their text books, and in this preparation, they are assisted by such explanations in the Recitation Room, and out of it, as the Instructor may deem necessary.

Lectures, accompanied by appropriate Experiments, succeed the Recitations in Natural Philosophy and Astronomy. They are designed to afford the Students more minute as well as extended views of the subjects already presented to their consideration, and by exciting curiosity, to give them interest and permanency.

As Arithmetic is the foundation of Mathematics, and the only branch of this Science required for admission into the Freshman Class, an intimate acquaintance with it will be expected of all applicants for Matriculation.

The attention of those preparing for advanced standing in any of the College Classes, is earnestly invited to the course of Instruction in the University. The Mathematical text-books have been selected with great care, and are believed to be second to none in the United States. Previous to their adoption, they were read through and compared with others, and the opinion was formed, that they were the productions of one who had judiciously selected and thoroughly digested his materials. There is such clearness and conciseness in the definitions, such simplicity, uniformity and beauty in the notation, as cannot fail to commend themselves to those engaged in teaching. In taking up a new author, the Student sees no connection with what he has already mastered, and feels himself embarrassed with novelties in notation, in modes of presenting and investigating subjects, and with references to matters of which he is profoundly ignorant. With these he must make himself fully acquainted, or be contented with a defective and insufficient preparation of his task. If he desire and determine to be a scholar, he must seek at whatever sacrifice, the requisite information; but if not—and the temptations to avoid labor are neither few nor feeble—the road to distinction will be found closed against him, and impeded and discouraged by increasing darkness, he will cease to make further efforts, and the fond hopes of parents and friends will be frustrated.

## DEPARTMENT OF RHETORIC AND LOGIC.

REV. W. M. GREEN, PROFESSOR.

THE Studies and Exercises of this department commence with the first term of the Freshman year, and receive more or less attention throughout the whole course. The text books are

VANDENHOFF'S SYSTEM OF ELOCUTION.

WORCESTER'S ELEMENTS OF HISTORY.

BLAIR'S LECTURES ON RHETORIC AND BEILLES-LETTRES.

HEDGE'S LOGIC.

The Freshman Class has a weekly recitation on the Elementary Principles of Elocution, accompanied with exercises in reading Prose and Poetry, and in declaiming in the Recitation room.

Themes are furnished to the Junior and Sophomore Classes once in three weeks. Their compositions are carefully examined, and returned with written corrections and oral criticisms.

The Junior Class is carried through Blair's Lectures the first term, and through Hedge's Logic and Worcester's History, the second. The recitations in Rhetoric and Logic are accompanied by informal lectures and copious illustrations; also by occasional exercises in Criticism and Translations from the Ancient Classics.

The Senior Class is required to deliver orations in the College Chapel, twice during the year, in addition to the usual exercises of Commencement. Their speeches, after having been corrected by the Professor, are rehearsed before him several times in private, previously to their being delivered upon the stage.

Two members of the three lower classes, taken in rotation, declaim daily, in the presence of the Faculty, after having practised privately before the Professor of Rhetoric.

## DEPARTMENT OF CHEMISTRY, MINERALOGY AND GEOLOGY.

REV. ELISHA MITCHELL, PROFESSOR.

On these branches, three lectures, illustrated by appropriate experiments, and the exhibition of specimens, are delivered to the Senior Class and such persons pursuing a Partial Course, as choose to apply themselves to these studies, in every week. The lecture is succeeded after an interval of an hour, or an hour and a half, by an examination extending through one hour, upon the facts and doctrines that were its subject. With these, the Student is expected to have made himself thoroughly acquainted, through the medium of notes taken at the time and some book of Elements. The text books of Dr. DRAPER, of the New York University, and of Prof. SILLIMAN, of Yale College, are recommended.

The history of Chemistry, its Nomenclature and General Doctrines, the Imponderables, (under which head the phenomena and laws of Light, Heat, Electricity, and Galvanism are treated of at such length as their relations to the science of Chemistry seem to require,) and the non-metallic elements, occupy the first term. In the second, the non-metallic elements, if any part remain unfinished, are completed—with the Chemistry of the Metals and of Organized bodies.

In Natural History, the Sciences of Botany and Zoology receive attention, so far only as is necessary to a knowledge of their methods, the classification, and the means employed for distinguishing different plants and animals from each other. A much larger portion of time is devoted to Mineralogy, and pains taken to render the Student familiar with the more common and useful minerals. With reference to this object, a very sufficient collection has been made, and is increasing from year to year, of such species as the rocks of North Carolina especially, afford, but which contain many specimens also from the neighboring States, and distant parts of the world. To this, the Student has free access, and ample opportunity of learning to distinguish one

species from another. The cabinet purchased some years since in Vienna, affords additional facilities, where a more accurate knowledge of the science is desired.

Geology is taken up near the close of the first, and continued through the whole of the second term. It is taught in lectures, and studied in a small volume prepared for the use of the Students, and in the composition of which, constant reference was had to the rock formations of North Carolina.

**MORAL PHILOSOPHY ;**  
**METAPHYSICS ; POLITICAL ECONOMY ;**  
**NATIONAL AND CONSTITUTIONAL LAW.**

**THE PRESIDENT.**

INSTRUCTION in these branches is given to the Senior Class, during three days of every week in the Collegiate year.

Metaphysics and Political Economy receive attention during the first, and National and Constitutional Law, the second term. The Sunday Recitations throughout the year are devoted to the Old Testament and Moral Science, and in addition, the recitations on Monday afternoon of the second term, are ordinarily assigned to the latter study.

The Text Books are The Bible, Wayland's Moral Science, Abercrombie's Inquiries concerning the Intellectual Powers, (Abbott's Edition,) Wayland's Political Economy, Story's Familiar Exposition of the Constitution, and the first volume of Kent's Commentaries on American Law.

No portion of either of the Text Books (except the Bible, instruction in which is confined to the Pentateuch) is omitted, but the whole carefully recited, subsequently reviewed, and each member of the class separately and rigidly examined on the entire system.

Oral Lectures are given, whenever in the opinion of the Instructor, they are calculated to promote the improvement of the class, and towards the close of the second term, a regular course is delivered on the History of Constitutional Law, presenting an analytical review, in chronological order, of the MAGNA CHARTA of King John : the Petition of Right ; the Charters of Carolina ; the Fundamental Constitutions, (by John Locke ;) the Habeas Corpus Act ; the Bill of Rights ; the Declaration of Independence ; the Articles of Confederation ; the Treaty of Peace with Great Britain, and the Constitution of the United States.

## ANNUAL EXPENSES.

Tuition,	.	.	.	.	\$50	\$50
Room Rent,	.	.	.	.	2	2
Servant hire,	.	.	.	.	5	5
Deposit,	.	.	.	.	4	4
Board for 40 weeks, at \$9 to \$10 per month,					84 to	92
Bed and Washing,	.	.	.	.	16 to	22
Wood,	.	.	.	.	5	5
Candles,	.	.	.	.	5	5
Total, from					170 to	185

Board, of a quality not inferior to what is furnished at the Tables of the most respectable, Boarding Houses of the neighboring villages, may be had at \$9 or \$10 per month. In addition to the above expenses, there are those incurred for books, pocket-money, and certain others incident to a connexion with the Literary Societies, the amount of which is fixed by the private regulations of those bodies.

The whole series of books, for the four years, may be purchased for \$50 or \$55. It is desirable that every Student shall retain his Text Books, and take them with him when he leaves College; but as they are not unfrequently parted with to the succeeding classes, at a reduced price, this item of expense is thereby rendered less burthensome to many.

Every Student is required on his arrival at the commencement of each Session, to deliver to the Bursar (Professor Mitchell) the moneys and drafts for money, which he has brought with him.

It is the duty of the Bursar to attend to the settlement of the demands for board, &c.—to pay into the hands of the Student such sums as are required for other necessary expenses, and to render a statement of the same to the Parent or Guardian at the close of the Session.

The Merchants in this place have entered into an engagement, that the system of unlimited credits heretofore in use, shall be abandoned; and that they will confine themselves in this particular, to those cases in which the Parent or Guardian has previously given a specific and definite sanction, and thus rendered the transaction his own. From the foregoing statements, it will be seen

what amount of money a young man is likely to require. With the safeguards, therefore, that have been provided, there is every reasonable security, if the regulations of the Trustees are complied with, that there will be no disappointment in regard to the expense of an Education at the University.

The Faculty concur in the opinion expressed upon this subject by the *Executive Committee*, in their Circular Address to Parents and Guardians on the 15th April, 1837, that exclusive of the supplies of clothing ordinarily obtained from home, more than two hundred and fifty dollars *per annum*, is not necessary, to either the comfort or convenience of any young man while at this Institution.

The Faculty are authorized in all cases, where the applicant is a native of the State, sustains a fair moral character, is believed to possess good talents and studious habits, and is unable to defray the expense of tuition and room rent, to admit him free of charge, into any class for which he may be prepared.

## LAW DEPARTMENT.

HON. WILLIAM H. BATTLE, PROFESSOR.

A department for the study of municipal Law has been recently established and placed under the charge of the Professor of Law. This department contains two Classes, of which, the first, called the Independent Class, will consist of such Students of Law as have no connexion with any of the College Classes; and the second, called the College Class, will consist of such irregular members of College as, with the permission of the Faculty, may be desirous of joining it.

The plan of studies comprises Blackstone's Commentaries, Kent's Commentaries, Stephen on Pleading, Chitty on Pleading, Greenleaf on Evidence, Chitty on Contracts, Cruise's Digest of Real Property, and Williams on Executors, together with Lectures on the municipal Laws of the State as modified by the Acts of the Legislature and decisions of the State Courts. A complete course will occupy two years for the Independent Class and two years and a half for the College Class, at the end of which the degree of Bachelor of Law will be conferred on such students as by their proficiency may be deemed to be entitled to it.

The Independent Class will be called on for recitations three times a week. The recitations of the College Class will be only once a week, and will be so arranged as not to interfere with the ordinary studies of College.

A Moot Court will be held occasionally by the Professor, for the discussion by the Students, of such legal questions as he may propose. The Students will also be required from time to time to draw pleadings and other legal instruments, and be instructed in the practice of the Courts.

The Professor of Law receives no salary from the Trustees of the University, but is entitled to demand from each member of the Independent Class, fifty dollars per session for the two first sessions of the course, and twenty-five dollars per session afterwards; and from each member of the College

Class twenty-five dollars per session. The sessions and vacations of this department will be the same as those of College, but the Professor will give instruction during the vacations to such members of either Class as desire it, without any extra charge.

The Professor of Law, and the members of the Independent Class, will not be subject to any of the ordinary College regulations.

**THE ANNUAL COMMENCEMENT**  
**IS ON**  
**THE FIRST THURSDAY IN JUNE.**

---

THE PHILANTHROPIC AND DIALECTIC SOCIETIES select, alternately, one of their members to deliver an Address before the two bodies, on the forenoon of the day preceding the Commencement.

---

ALL the Classes are required to attend Divine Worship in the College Chapel on Sunday forenoon, and in the afternoon, to recite on the Historical parts of the Old and New Testaments.

The Collegiate year is divided into two Sessions or Terms, the one commencing six weeks after the first Thursday in June, the other six weeks after the Friday, succeeding the fourth Friday in November.
